Dear Kim,

Thank you for making our work lives easier! We absolutely **love** the new Wycom Premier check signing solution. Printing and signing our checks in one easy pass to the laser printer is so much quicker than loading the old continuous form checks on the dot matrix printer and then loading them in another machine to sign and then having to burst them all. The system is everything we hoped for and more. We are already looking into other ways we can make the printer useful, printing our purchase orders, for example, and thereby eliminating another continuous form printer.

Also, buying the secure blank check stock not only saves us a lot of money vs. the pre-printed checks, it also is more secure and we don't have to worry about any missing checks.

Finally, you and Brad were great to deal with. We appreciate the explanation of all the various options and the quick and easy installation and training, in addition to the extra time you took to help us support our proposal and get the program in place. It was a pleasure doing business with you and we would recommend F&E Check Pro's to other companies looking to improve their payables' process.

Regards,

Pam Carty  
Accounts Payable Manager
