Dear Kim and Brad,

As you know, we have recently started using the Wycom Unit to print our checks. It has really made the printing of our checks much easier.

Printing checks onto secure blank check stock is much easier and more secure than our old process. We like the increased security of not having to inventory our checks anymore. Using blank check stock allows us to print the bank information as the checks are sent to the printer utilizing the dual-key security feature.

We would highly recommend you and F&E Check Pros as a great company to work with for anyone looking to streamline their check printing process.

Thanks again for all your help.

Sincerely,
